

ELIÁN REHBANI Argentina, Buenos Aires, Mar del plata

Full stack developer

Full Stack Developer with experience in creating customer-focused solutions and specializing in ReactJS. Currently refining my skills to cover the entire project lifecycle. My short-term goal is to continue strengthening my technical competencies in Full Stack projects, working in teams to develop efficient and scalable products. I am interested in Frontend or Full Stack Developer positions where I can apply my knowledge and continue growing professionally.

WORK EXPERIENCE

Frontend Developer at Gravidad

January 2024 - Present

- **Design and implement high-quality user interfaces** leveraging the capabilities of ReactJS.
- **Implement a wide range of projects** while strictly following design patterns and guidelines established in Figma.
- **Collaborate closely with backend and frontend teams** to facilitate seamless integration and timely project completion.
- **Optimize frontend templates** through adaptations, refactorings, and simplifications to significantly enhance project efficiency and speed.
- **Utilize various problem-solving strategies** to effectively address challenges and resolve issues during project execution.

PROJECTS

- **Ooink.me** (Next.js - Prisma ORM - TailwindCSS)

<https://github.com/ERehbani/ooink.me>

Web application for encoding and managing public links, designed to facilitate the exchange of links. The main challenge of this project was to develop an efficient system for generating and redirecting unique codes associated with links, utilizing an optimized database to manage the creation and storage of these connections. This solution significantly enhances the ease of sharing links securely and in an organized manner.

- **COSMEE WEB** (Next.js - Firebase - TailwindCSS)

<https://cosmeeworld.com/>

Web application for cosmetic recommendations based on personalized diagnostics. Users complete a series of questions that generate a detailed analysis of their skin type and needs. This analysis is complemented by an AI study of their facial features, identifying the main problem areas. The results include graphs and specific product recommendations optimized to address the identified needs, providing a completely personalized and data-driven experience.

SKILLS

Collaborative - Agile learning - Communicative - Teamwork - ReactJS - NextJS - TailwindCSS - Typescript - NodeJS - ExpressJS - MongoDB - Zustand
